

Register Multi-factor authentication (MFA)

Instructions

What is Multi-factor authentication (MFA)?

Using MFA greatly increases the security of your user account. The most common Multi-factor option is using two factors, called Two-factor authentication (2FA).

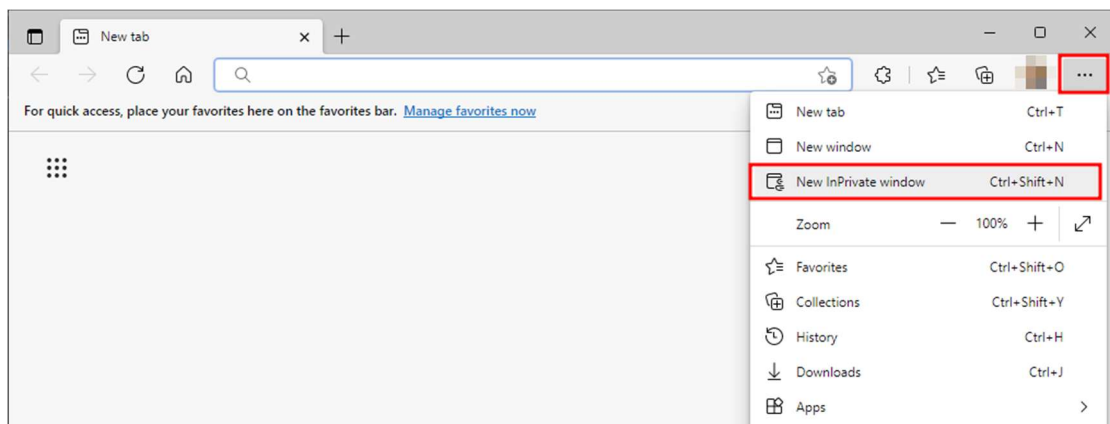

How to register your phone and mobile app for MFA

You will need to have your mobile phone ready and use a computer to register MFA.

You must be in one of Jula's stores or HQs and connected to our network in order to register MFA. You can't register from outside of our locations.

1. Open **Microsoft Edge**.

If you are using a shared computer, open an InPrivate window. An InPrivate window can be opened by following the image below

2. Navigate to <https://aka.ms/mfasetup> and sign in with your email and password

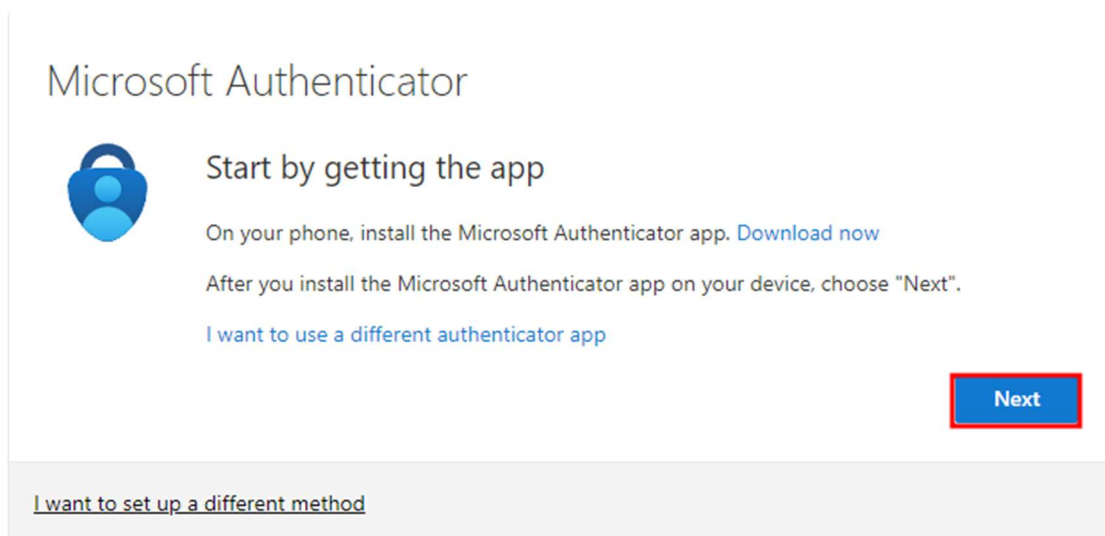

3. After signing-in you will be taken to a configuration wizard to set up MFA. Just follow the steps and read the information that appears

- a. After signing in, click **Next**

- b. Download the Microsoft Authenticator app on your phone, then click **Next**. Use the **Download now** link to download it from **App Store** or **Google Play**

- c. Open Microsoft Authenticator on your phone and allow notifications,

then click **Next**

Microsoft Authenticator

Set up your account

If prompted, allow notifications. Then add an account, and select "Work or school".

- d. Add an account by scanning the QR code. Make sure to select "*Work or school*" if asked. Click **Next** after the account has been added

 **Don't try to add an account to Microsoft Authenticator by using your email and password**

Microsoft Authenticator

Scan the QR code

Use the Microsoft Authenticator app to scan the QR code. This will connect the Microsoft Authenticator app with your account.

After you scan the QR code, choose "Next".

Can't scan image?

- f. When you get to the last screen, click **Done**

4. When the wizard has been completed the *Security info* page will show up and you can find *Microsoft Authenticator* added as a sign-in method

Multi-factor Authentication (MFA) is now registered and enabled for your account!

Using MFA to login

If a sign-in requires you to use Microsoft Authenticator, the image below is what will show up. To continue the sign-in, enter the number that appears in the Microsoft Authenticator notification.

Jula365

Approve sign in request

Open your Authenticator app, and enter the number shown to sign in.

47

No numbers in your app? Make sure to upgrade to the latest version.

Don't ask again for 30 days
